What Our Graduates Are Saying About This Course

"This was my first experience with a prep course and I was blown away by the quality of the course and the support of the staff. I passed my exam on my first attempt and I am grateful for the support and guidance I received from the staff. I highly recommend this course to anyone who is preparing for the exam." — Alan Berger, MD, University of Minnesota, Minneapolis, MN

Dear Colleague,

How do you crush your Cardiovascular Disease MOC Exam the first time, so you can get on with your life without this exam hanging over you? You do it with massive focused action. In practice, this means preparing with a focused, intense and comprehensive board preparation course.

The Pass Action® Cardiovascular Disease Maintenance of Certification Exam Prep Course is a complete board preparation system that gives you everything you need to pass your exam with a minimum of stress, time and effort.

This Course is a Virtual Pass Machine. Here's Why:

- Laser-Focused Lectures:** Laser-focused faculty lead you through 4 intensive days of high-yield lectures. To ensure optimal exam efficiency, we use a lecture approach called "Question-based learning." Every lecture is constructed out of a series of lecture components, each centered on a specific multiple-choice question. This format engages you in the material, increasing your retention, critical sense and helping you crush your upcoming board exam.
- Online Practice Exams:** As part of your course package, you receive access to 300 multiple-choice questions with explanations. Not only do these practice exams help you identify areas for further review, but you also gain exposure to the computer-administered test format. Every question contains a detailed explanation, so each topic is reinforced through repetition. And, you even have the option to save and re-use questions, or take simulated practice tests that include only the questions you got wrong the first time.
- CME Included:** Earn up to 20 AMA/ACME Category 1 CME hours by attending. All of your speaking time, or simply our staff will cover the costs of the CME activity.
- Printed Course Syllabus:** To best accommodate your note taking and review, you receive a thick binder of colorful materials. With these printed lectures to follow along with, you're better able to focus on the material and take more productive notes.
- Three Ways to View Lectures:** We provide you with unparalleled flexibility in viewing the lectures, so that you can study every course activity course. You get to choose:
 - Live Attendance:** When you attend the course, you receive 400+ instruction—you focus on your lecture and have your objectives distributed before, between and after your questions and cases.
 - Online Lecture Access:** After you return home, view all lectures as streaming video on the web from your computer or view on your iPad. In any order that you like. Because you view the speaker and lecture slides side-by-side, it's just like being at the live course.
 - Mobile Lecture Access:** Control any video lecture via your iPad. View all the lectures on your iPhone® and iPad® (iOS) or Android™ device,* so you can review for your exam anytime and anywhere. Course participants love the feature!
